## V-R200

**CASIO**  
BETTER FOR BUSINESS

The V-R200 comes complete with a sophisticated, fully-functional and intuitive EPOS application that will enable your staff to serve customers with the utmost efficiency. It is highly customisable so that you can adjust and refine the application to suit your particular needs. The software has been designed specifically to make the most of the V-R200 hardware so you can be sure of a robust and reliable all-in-one solution – all from one of the world's leading EPOS vendors.

### Ideal for Hospitality

If your business is a restaurant, cafe or pub the Casio V-R200 solution offers one of the most versatile and powerful EPOS packages on the market.

Whether you need a standalone system or a series of networked terminals with sophisticated check tracking and separate order printers, the V-R200 fits the bill.

The latest incarnation of our EPOS application features a colourful and flexible floorplan screen that allows your staff to interact with tables via a realistic representation of the actual layout of your establishment. Colour coded table status indicators and informative icons allow your staff to see the status any table at a glance.

The V-R200 takes the interaction between order taking and kitchen preparation to new levels, with timely messages being generated for the kitchen staff to follow, making sure meals are prepared on time, every time.

The system also works well for bars and pubs, with Dallas Key integration for staff sign-on, flexible printing, running tabs and much, much more.

If you prefer a larger screen and a more traditional Hospitality terminal form factor, take a look at the V-R7000 – it runs the same excellent EPOS software as the V-R200.

### Easy for the Manager

Whether you use the EPOS features directly or the optional Casio Cloud Suite, it has never been easier to manage the day-to-day changes your business requires. From table layouts to promotional offers to fine control of kitchen messages, the V-R200 EPOS solution has it covered.

### Easy for Staff

Taking orders at the point of sale has never been easier. The colourful display of the V-R200 enables staff to easily become confident and proficient. The software has been specially designed to support not only efficient order taking but effective management of the entire meal process.

### Casio Cloud Suite

The back office system can be accessed anytime from anywhere on any device capable of running a web browser. The Casio Cloud Suite is made up of several optional modules, allowing you to choose the features that suit your business best.

### Adaptable

The system is highly flexible and adaptable to various hospitality business scenarios. From a simple standalone till to a Cloud-connected network of tills, the V-R200 is up to the task. Till changes, such as prices and promotions, can be easily managed by staff. Access control and security are also strong features with staff only allowed to access the features they need and no more.

### Built-in printer

The high-speed built-in printer accepts a 58mm or 80mm paper roll. Drop-in paper loading facilitates easy roll change so customers aren't made to wait.

### Easy to operate

A 10.4 inch highly sensitive large-screen touch panel LCD, supporting efficient high-speed operation, ideal for busy periods.

### Stylish design

A highly refined, stylish design made from an attractive glossy material that will fit into any hospitality interior scheme.

### Exceptionally Low Power Consumption

Power consumption is limited to approximately 18 watts during operation and 12 watts on standby, resulting in significant power savings compared to conventional POS systems as well as boosting green credentials.

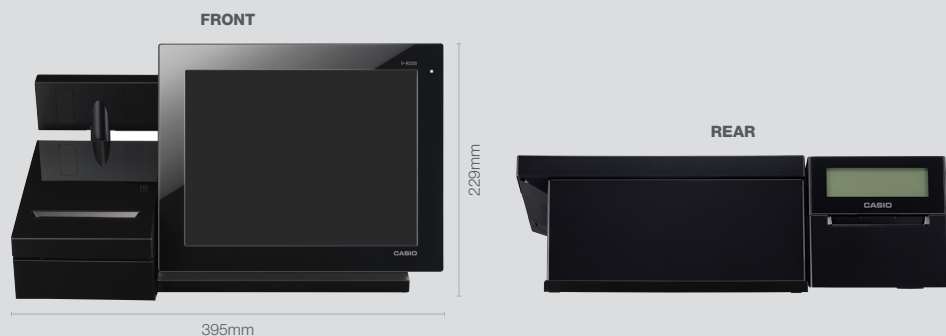

Low Power  
Consumption
